2014-2015 PROGRAMS

School of Imagination is a year-round school program:
 September 2014 through September 2015

Please see the school calendar for scheduled holidays and closures

STEP ONE: PRESCHOOL

School of Imagination's Step One class is designed to introduce your little one to his first academic experience. Our small class size allows us to ensure that each child receives the care, attention and support he needs when learning how to interact in the classroom environment and with peers. We provide fun and unique hands-on learning strategies for all children! Your child will develop academic skills through fine-motor and sensory activities, artistic expression, language concepts, math, and science. We use "Zoo-phonics" as their first introduction to sound and letter recognition. Our program allows your child to develop the skills, character and confidence as well as a love of learning! Parent participation is greatly encouraged! We offer your child a wonderful and supportive environment for children to learn from a highly-trained staff that includes group work with a Speech-Language Pathologist.

ALL STARS: SOCIAL & FUNCTIONAL LANGUAGE

The social skills classes focus on teaching children social skills and functional language in order to help them achieve greater success interacting with their peers and the world around them. We have themes, circle times and centers similar to that of a preschool classroom yet the focus is language and social interaction. Social skills classes will encourage independence and interaction with peer models through fun and exciting classroom activities.
